Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED. (35 U.S.C. § 133)
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Art Unit: 2871

Election/Restriction

1. This application contains claims directed to the following patentably distinct species of the claimed invention :

(I) the specifics of the device being comprised of an electrode pattern adjacent to the seal pattern and outside the active area (Figures 4-5, claims 1-10);

(II) the specifics of the device being comprised of a seal pattern formed peripherally to the active area between the first substrate and the second substrate, and having projected corner portions (Figure 6, claims 11-21).

2. If species (I) is elected above, a further election of one of the following patentably distinct species of the claimed invention is required :

(Ia) the specifics of the device being comprised of the electrode pattern is applied with a constant DC bias voltage (claim 8);

(Ib) the specifics of the device being comprised of the electrode pattern is applied with a voltage which is stepped down from a common voltage applied to the common electrode (claim 9);

(Ic) the specifics of the device being comprised of the electrode pattern is applied with a voltage which is reversed in polarity from a common voltage applied to the common electrode (claim 10).

Art Unit: 2871

3. If species (II) is elected above, a further election of one of the following patentably distinct species of the claimed invention is required :

(IIa) the specifics of the device being comprised of the electrode pattern is applied with a constant DC bias voltage (claim 19);

(IIb) the specifics of the device being comprised of the electrode pattern is applied with a voltage which is stepped down from a common voltage applied to the common electrode (claim 20);

(IIc) the specifics of the device being comprised of the electrode pattern is applied with a voltage which is reversed in polarity from a common voltage applied to the common electrode (claim 21).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, there is no generic claim.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the

Art Unit: 2871

limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

4. A telephone call was made to Mr. David Hardy on November 20, 2001 to request an oral election to the above restriction requirement, but did not result in an election being made.

Mr. Hardy elected species (1) on November 19, 2001.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any

Art Unit: 2871

amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
